Subject: CCF

Mr. Lodico;

USA Mobile Drug Testing: Request- to allow the option for federal CCFs to be produced using software and a laser-printer at the collection site that have the capability- is achievable during this rule-making process. Technology is upon us.

We use and have developed along with CIS & USAMDT's (IT) department: printable software at the collection site using the most up-to-date employer, laboratory, and MRO information, which ensures more reliable and timely routing and distribution of results and will allow the same for CCF copies. USAMDT's Labs are tied right in with USA Mobile Drug Testing Network. RESULTS That's the Business we are in, costly but Productive. All of USA Mobile Drug associates and customers network is a finger tip away.

Yes we are looking for ways to decrease cost and increase productivity and why not this is the world we live in. I understand this will factor in a huge cost for the smaller testing companies, we know it cost hundreds of thousands of dollars for CIS & USAMDT to bring this to the next level and beyond. that is why USAMDT associates have come aboard to decrease their cost and increase their productivity. The Printing cost alone for these forms, keep adding to the bottom line. Everything goes up, ok we lose the print (So did the Newspaper Industry), we did not decrease cost we increased the cost, but completed a circle that is user friendly. This may send a message to the Legal industry to back off, Documented, files, stored in fire proof location, along with separate back up. USAMDT uses a company out of RI.

So I guess this means if we do not move to the level, , you can keep selling services based on the LOWEST price?

This is a very educated industry, changes taking place daily, this is not a service that can be manufactured and performed from overseas. This is Drug Testing that the personal we are testing may affect lives, careers and Family. This is a service business that companies have invested monies into employee educated personal to attend to the ever day business of Drug testing.

Laser Software is much more user friendly. USA MDT's system: You cannot proceed to the next page IF JUST ONE LINE ITEM IS NOT FILLED IN, IT IS RED LINED. Will it hold up it court You Bet.

When we test Mr. Lodico we also go to the next step above and beyond for verification, we are way ahead not sitting back waiting for something to happen, which I will share with you at a later date.

Regards:

Joseph M Strom
