Subject: Comment on Notice of Proposed Revisions to the Federal Custody and Control Form.

Sir: I am writing this e-mail to ask for your consideration of adding to this proposed revision the option to make it friendly to "on-demand" production with a laser printer for those sites that have the capability. I am certain you have had countless e-mails detailing the advantages of including such a provision so I will not repeat them here.

As a 35+ year veteran of supporting effective drug prevention activities, including 15 as a Medical Review Officer provider, I am of the opinion that providing such a provision adds value to the proposed rule without any loss.

Yours truly,
