Subject: CCF Revisions

Mr. Lodico,

I hope there is still time to reconsider the HHS stance on the multi-part CCF. The required Okidata or other dot-matrix printers required for this rule are outdated, difficult to find, almost out of production, and difficult and unreliable even when new. In fact, the biggest headache in administering drug testing for 1000 client employers as we do, is maintaining function and backup of our fleet of Okidata printers at 14 collection sites. The ability to have a one page laser-printed form on demand would be a godsend.

THANK YOU!!!
