Subject: The Revised CCF

Mr. Lodico -

I support the idea of using software and a laser printer to create DOT CCF's. It will be cost effective and use less paper/ink, something that is a win-win for every party involved in the process.

The use of a digital signature also creates a document that can be instantly transmitted the MRO and Employer alike, reducing the need for mailing and or faxing (not to mention that you have to make a darkened copy of the MRO copy of the traditional 5-part form in order for the fax to be legible on the receiving side).

Thank you for supporting this idea.

If you support the idea of SAMHSA, and ultimately DOT, allowing the option of producing federal forms using software and a laser printer “on-demand”, please submit your comments before January 19th, 2010.

Best Regards,

Chris Dalby, VP
