Subject: SAMHSA Changes addition

Dear Mr. Lodico –

We welcome the changes that have been proposed. On the flipside, the continued need to use pre-printed 5 part forms has not been addressed. With the government's constant push to reduce paper, this deficiency needs attention. The use of laser printers and electronically stored images reduces the need for always producing pre-printed forms. There should be an option if all the forms are not needed to substitute other electronic output and storage in place of pre-printed forms. The same information would still be required just not always in paper form.

Sincerely,

W. Patrick Cotty
Vice President
Physician Services Inc.
