Subject: SAMHSA Changes addition

Dear Mr. Lodico –

We welcome the changes that have been proposed. On the flipside, the continued need to use pre-printed 5 part forms has not been addressed. With the government's constant push to reduce paper, this deficiency needs attention. The use of laser printers and electronically stored images reduces the need for always producing pre-printed forms. There should be an option if all the forms are not needed to substitute other electronic output and storage in place of pre-printed forms. The same information would still be required just not always in paper form.

Our company Physician Services inc. has pioneered the electronic technology for COC's over 7 years ago for non-DOT collections and has been extremely successful. We would love to demonstrate our technology to you. <http://www.testell.com/>

Sincerely,

Scott Farrell
President
Physician Services Inc.
